

TAXATION & FISCAL RESPONSIBILITY

- POLICY STATEMENT -

To achieve a balanced budget, either government spending must be reduced or more tax dollars must be raised. Economic growth can be encouraged by wise government spending; however, the Grange supports a prudent fiscal policy by curtailing expenditures in several areas. We recommend action be taken to move toward balanced general fund budgets and reduction of fraud at all levels of government. Future generations should not be burdened with the expenditures of today. The growth of government debt must be stopped.

Fraud is a waste of money that affects all aspects of life. We all pay for fraudulent practices through higher costs at the store, higher insurance premiums and higher taxes. Authorities should vigorously prosecute those who commit fraud at all levels of Government.

Local governments are burdened by the weight of mandates. These mandates must be fully funded by the government of origin. We call upon the Governor and State Legislature to repeal unfunded mandates. We favor legislation to bar the state and federal governments from imposing any new mandated services on local governments unless they fully fund these mandates.

Alternative tax sources should be explored that are fairer and more equitable than our current tax policies. Dedicated funds must be used solely for the purpose for which they were intended.

Timely passage of the New York State Budget is a necessity. The development of the budget should be a fair and open process.
